THE WHIZKIDS FOUNDATION INC
STATEMENT OF PROGRAM SERVICES

Primary purpose/main goal of WhizKids: The main goal of WhizKids is to spark student interest in mathematics and the sciences. We do this through our various programs, which will be listed below. Essentially, however the goal is to bring the hands-on aspects of these subjects to the students so that they can learn the direct real-life applications of math and science.

The four largest programs we are currently running are:

1) The Exciting World of Science: (Program in progress since 2002) For this program, WhizKids has designed hands-on, activity-based modules in the STEM (science, technology, engineering, and mathematics) areas to serve as teaching supplements. Each module follows national and state standards and has been designed to contain a lecture segment and a hands-on laboratory segment. Currently, modules in biology, genetics, chemistry, earth science and physics have been developed. Our staff members go into the schools either during the school day or for after school programs (depending on the school district) and teach students in grades 4-8. They teach the modules and do the hands-on labs. These labs are usually somewhat high tech and are not topics the students would usually see at school. Once again, the idea is to really spark the students' interest as much as possible. Also, because the modules are based on national and Massachusetts educational frameworks standards, they help the students prepare for the MCAS exam and follow with what the students are learning in the curricula.

We provide the teaching staff, and all of the materials. The school's pay nothing. To date, this is our most extensive program. We are working with hundreds of students from all around Massachusetts. We are currently teaching in all middle schools in Everett, MA, and in several schools in Revere, Ma. We are also teaching in Framingham, MA and also in Marblehead, MA.

Additionally, we are teaching students from Boston, Roxbury, and Jamaica Plain, MA.

2) Field Trips and Presentations: (Program in progress since 2002) WhizKids helps to arrange and pay for field trips that can be arranged to a variety of locations. Before the field trip, WhizKids gives presentations to illustrate a particular topic. The information is reinforced at the location of the field trip. Current WhizKids field trip locations include:

The Museum of Science (in progress since 2004) The New England Aquarium (in progress since 2005) MITRE (in progress since 2006) The McAuliffe Space Center (in progress since 2006) Massachusetts Institute of Technology (in progress since 2002) MIT Museum (in progress since 2002) Center for Engineering Educational Outreach at Tufts University (in progress since 2006)

Once again the mission is to take students to the locations where they can learn more about the practical applications of real science. Our staff provide instructional lectures and guide the students on the

trips. Other than paying for transportation, there is no cost to the schools once again. We have worked with students from many schools around Massachusetts. I would say in total, around 200 students have been served in this program.

3) Science Day Development: (Program in progress since 2005) This is one of our most popular programs. We have developed a program called CSI Comes to Boston. This is a single science day that can be designed for schools and organizations' This program is specifically tailored to the needs of the organization we are working with. Students are invited to MIT for a day-long science experience where they solve a mock crime using forensic science techniques in Biology, Chemistry and Physics. All lectures and experiments follow Massachusetts Board of Education guidelines. WhizKids staff have created the lectures and experiments. We organize the materials, and provide qualified staff and presenters for the event. The goal of this is to provide a single day-long experience where students are treated like real forensic investigators. At the end of the day, they must present their findings to their parents and peers in one of MIT's biggest auditoriums. Usually the audience is close to 300 people. They must give oral presentations describing their results to the rest of their peers. The students involved in this program have come from dozens of schools from around Massachusetts and Rhode Island. To date, we have probably worked with over 500 students for this program.

4) The Art of Entrepreneurship: (Program in progress since February 2006)

WhizKids and NECINA (the New England Chinese Information and Network Association) have co-designed and are co-running an entrepreneurship contest called "YES" (Youth Entrepreneurship Service). Students will attend lectures given by successful entrepreneurs, learn how to write a business plan, and will compete in a business plan contest. In our first version of this, 24 students signed up to participate. Currently, this year, we have 50 students signed up. This program takes place at MIT's Sloan Business school.

Students compete for prizes.

The goal of this program is to teach students how to be entrepreneurs. In today's world it is important to learn how to integrate science and entrepreneurship. This program teaches this. The students involved in this program come from 24 different schools from around Massachusetts.
