Identifier	Return Reference	Explanation
Schedule D, Part X		In fiscal Year 2011, the Organization adopted the accounting standard on accounting for uncertainty in income taxes, which addresses the determination of whether or not tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under this guidance, the Organization may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by taxing authorities, based on technical merits of the position. The tax benefits recognized in the financial statements from such a position are measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. The guidance on accounting for uncertainty in income taxes also addresses de-recognition, classification, interest and penalties on income taxes, and accounting in interim periods. Management evaluated the tax positions for the organization and concluded that the organization had taken no uncertain tax positions that require adjustments to the financial statements to comply with the provisions of this guidance. The organization is no longer subject to income tax examinations by U S federal, state or local tax authorities for years before 2007, which is the standard statute of limitations look-back period.
