The Academy has a three-pronged mission: to advance scientific research and knowledge, to help resolve the major global challenges facing society with science-based solutions, and to increase the number of scientifically informed individuals. The Academy offers an array of programming: dynamic conferences and symposia on basic and applied research in cutting-edge, interdisciplinary fields and on the broader roles of science, technology, and culture in society; career development and training for graduate students and postdoctoral fellows in the sciences; live public events that bring scientists together with artists, writers, and other cultural experts to present emerging research; a global public-private humanitarian partnership to bring science-based solutions to quality-of-life issues in the developing world; an advisory program in innovation and economic development for municipal, state, and foreign governments; and a science education initiative that includes teacher training and afterschool mentoring for low-income middle-school students.
