SASB envisions a world where all forms of capital are accounted for and managed. With SASB industry-specific standards in place, companies compete and improve performance on the sustainability issues that matter most and investors drive capital to the most sustainable outcomes. SASB defines sustainability as environmental, social and governance factors that have the potential to affect long-term value creation and/or are in the public interest. SASB is accomplishing this through intensive evidence-based research of material issues within industry; convening working groups to establish accounting metrics; partnering with the accounting profession to develop auditing protocols; and providing education with regard to recognition and accounting of material non-financial issues.
