The mission of Advanced Energy Economy Institute, Advanced Energy Economy's charitable and educational affiliate, is to accelerate an equitable transition to 100% clean energy and electrified transportation. AEE Institute carries out its mission in a number of ways, both directly and through products and services it creates that are made available to the general public through AEE.

2 Did the organization undertake any significant program services during the year which were not listed on the prior Form 990 or 990-EZ? Yes No

If "Yes," describe these new services on Schedule O.

3 Did the organization cease conducting, or make significant changes in how it conducts, any program services? Yes No

If "Yes," describe these changes on Schedule O.

4 Describe the organization's program service accomplishments for each of its three largest program services, as measured by expenses. Section 501(c)(3) and 501(c)(4) organizations are required to report the amount of grants and allocations to others, the total expenses, and revenue, if any, for each program service reported.

4a (Code:) (Expenses \$ **1,480,390** including grants of \$ **140,500**) (Revenue \$)

Electrifying transportation: This initiative is designed to accelerate the electrification of transportation across the country. This program works to speed the adoption of electric vehicles (EVs), charging infrastructure, and supportive technologies/services through a targeted strategy focused on key states. The specific policies pursued include, but are not limited to, those that reduce the upfront price of the vehicle, accelerate charging infrastructure deployment, modernize utility regulations to integrate EVs, and address the specific challenges facing medium- and heavy-duty vehicles.

4b (Code:) (Expenses \$ **1,347,392** including grants of \$) (Revenue \$)

Driving technology adoption: U.S. energy policy is primarily determined at the state and local level and Advanced Energy Economy Institute carries out its mission by providing a platform for the discussion of advanced energy issues and the development of policy frameworks for use by a range of state and regional stakeholders across various states. In articulating the public benefits of advanced energy, AEE Institute shares technical decisions maker education and engagement: a program to get pro-advanced assistance, communications expertise and state of the art economic and policy analyses of the advanced energy business sector with state and regional partner organizations, policy makers and other interested parties.

4c (Code:) (Expenses \$ **1,295,141** including grants of \$) (Revenue \$)

Expanding Wholesale Markets: This initiative seeks to eliminate barriers to the participation of advanced energy technologies in competitive wholesale markets. This work includes, but is not limited to, reforming legal independent system operator and regional transmission organization (ISO/RTO) market rules and operating practices that restrict or limit the ability of advanced energy technologies to participate in the markets, pursuing new market designs that better accommodate and take advantage of the unique physical and operational characteristics of advanced energy technologies, and opposing market rule proposals that would unfairly disadvantage advanced energy technologies or give undue preference to incumbent technologies.

(Code:) (Expenses \$ **403,966** including grants of \$) (Revenue \$)

Decisions maker education and engagement: A program to get pro-advanced energy commissioners appointed, educated and empowered to achieve long-term transformation to support the advanced energy industry.

(Code:) (Expenses \$ **4,116** including grants of \$) (Revenue \$)

Buyers Group: The advanced energy buyers group represents the perspective of large energy users on key advanced energy policy issues, and works to ensure that these important and influential stakeholders have a voice in policy discussions. The buyers group is primarily focused on policies that expand or improve opportunities for customer-driven advanced energy deployment, such as fostering more competitive wholesale markets and encouraging increased customer choice and utility-provided renewable energy offerings.
