Research and Regulatory AffairsWe promote alternatives to animal use in research, testing, and education. To improve physician training, we work to replace animals in residency training programs. As a result of our work, only eight of 285 surveyed emergency medicine residencies in the U.S. and Canada continue to use animals. In FY 2022, we launched new campaigns by filing federal complaints to challenge the use of live animals for medical training at two schools. We held physician-led demonstrations and posted ads targeting animal use at six schools, including the University of Arizona. We ended animal use for medical or veterinary training at two schools, and in both the paramedic training program and general surgery residency at the University of Washington.Our toxicologists actively promote the development and implementation of nonanimal-based tests for chemical toxicity, including training students and career toxicologists. In FY 2022, we published two peer-reviewed manuscripts making progress on human-based approaches for acute lethal toxicity and occupational allergic asthma. We also led a case study, which was approved and published by the Organization for Economic Cooperation and Development, on a human-based approach for assessing the toxicity of chemicals to the respiratory system. Our training offerings in FY 2022 reached over 6,000 professionals. A monthly webinar series attracted hundreds of scientists, students, and regulators from around the world. We also launched a concurrent discussion series featuring leaders in the field, attracting over 1,000 attendees in the first four sessions. To support students and early career scientists, we held the second North American Summer School for Innovative Approaches in Science, which offered an educational program for toxicology and biomedical research students interested in nonanimal science.

Form 990, Part III, Line 4d: Other Program Services Description	OTHER PROGRAM SERVICES 4: PublicationsWe support nutrition and research ethics educational efforts through the design and production of print and electronic materials. In FY 2022, we completed more than 1,200 separately tracked projects, including print and display materials, promotional merchandise, and electronic graphics and e-publications. Good Medicine, the Physicians Committees 24-page magazine, keeps members informed and involved. Four issues of Good Medicine were published in FY 2022. Total print distribution was 335,731. OTHER PROGRAM SERVICES 5: CommunicationsWorking with physicians, health experts, and celebrities who serve as spokespeople, we inform, persuade, and inspire readers through strategic media relations, social media, digital communications, and advertisements. Our work was featured in traditional news outlets, including The Washington Post, CNN, CBS News, Politico, New York Daily News, Bloomberg, and many others. Each month, we reached a potential audience of 83 million by appearing in an average of 105 news outlets. Our social media content created conversations daily among more than 1.6 million followers on 13 social media accounts. In FY 2022, 4.6 million people engaged with our content, up 25.4% from FY 2021. We reached 230 million accounts, up 37% from FY 2021. Our YouTube channel received 16.4 million views in FY 2022 and gained 148.3 thousand subscribers, bringing our total to 337 thousand. The Exam Room podcast was downloaded more than 4.9 million times in FY 2022 and 10 million from its 2018 launch through FY 2022. Our website received 8,702,880 total page views in FY 2022. OTHER PROGRAM SERVICES 6: Clinical ResearchWe design and conduct clinical health and nutrition research studies, with the goal of motivating more attention in diet and prevention among healthcare professionals, medical researchers, policymakers, and patients. Research staff and colleagues published 12 papers in peer-reviewed journals and presented their research at the American Diabetes Associations Scientific Sessions and at the International Symposium on Diabetes and Nutrition of the Diabetes and Nutrition Study Group of the European Association for the Study of Diabetes. We finished a 12-week clinical study for postmenopausal women with hot flashes, tracking their body weight and frequency and intensity of hot flashes. This study helped reduce the frequency and intensity of postmenopausal hot flashes. We started a clinical trial, testing the effects of a vegan diet in women with endometriosis and its ability to reduce pain. We are currently comparing a vegan diet with a standard portion-controlled diet in people with type 1 diabetes, tracking insulin requirements. Our goal is to build upon the body of knowledge of the value of plant-based diets and generate wider acceptance, among the medical and scientific communities, policymakers, and the press, of the power of plant-based diets to prevent and treat disease. OTHER PROGRAM SERVICES 7: Education and PolicyWe partner to conduct advocacy for plant-based diets. At the federal level, we advocated in Congress to end the inequitable statutory barriers that prevent students from accessing nondairy milks at schools participating in the National School Lunch Program. In California, we supported funding to incentivize plant-based meals in public schools, leading to the passage of a state budget that includes historic investments in the states school meal program to expand healthy, plant-based meal options. We advocated and built support in the state legislature for two bills to advance better nutrition in New York: a measure to expand access to plant-based meals in schools and a bill to require physicians to take nutrition education. We supported a bill in the District of Columbia to make plant-based foods available to patients, staff, and visitors in all hospitals.We also conduct activities to encourage the funding, development, and implementation by federal and state legislatures and agencies of human-relevant, nonanimal test methods for chemical, product, and drug safety. In Rhode Island, we advocated for legislation aimed at convincing Brown University to halt the use of pigs for training emergency medicine residents. The Physicians Committee testified in support of this legislation and will continue to advocate for its passage. In Michigan, we supported legislation to outlaw the use of dogs in painful experiments at public institutions. At the federal level, we lobbied Congress to include report language in the Labor HHS Appropriations bill that calls for expanded transparency and accountability for NIHs use of animals in experiments. We also sought appropriations language directing FDA to modify regulations mandating animal testing and establish a pathway for regulatory acceptance of nonanimal approaches. Physicians Committee president Neal Barnard, MD, FACC, oversaw clinical research studies and medical education programs, including the International Conference on Nutrition in Medicine. He presented at medical schools and hospitals and conducted interviews to educate listeners about healthful nutrition and modern ethical research methods. The Physicians Committees ecommerce and fulfillment operation provides educational literature and merchandise to its members, the health care community, and the public at large on topics relating to nutrition, disease prevention, and ethical science. In FY 2022, more than 15,000 pieces of literature were downloaded from our website, and we fulfilled more than 1,000 physical orders of 31,617 pieces of literature and merchandise (books, DVDs, educational posters, etc.) to locations around the globe.
