Play Therapy Program for children aged 3-12: Play therapy is a specialized form of psychotherapy & counseling designed to harness the power of play to help children express feelings, learn coping skills, gain interpersonal skills, and resolve blockages to achieve optimal growth and development. The Summit's certified play therapy supervisors and trained play therapists incorporated evidence-based practices and techniques. Client assistance pro bono discounts and fee subsidies ensure that those in need receive the help they need. Dialectical Behavioral Therapy (DBT) Group Program: DBT is an evidence-based psychotherapy and education program that has proven useful for treating symptoms of anxiety, mood disorders, and suicidal ideation, as well as for changing ineffective behavioral patterns associated with self-harm, substance abuse, and disorders of emotional instability. The Summit utilizes intensively-trained DBT therapists and supervised therapists to provide DBT therapy and DBT education groups that train clients in mindfulness practices, distress tolerance, emotional regulation and interpersonal effectiveness. Educational groups are provided for adults, teens (and family members of teens). The Summit provided 393 hours of DBT group programming and served 53 adults and adolescents. Client assistance pro bono discounts and fee subsidies ensure that those in need receive the help they need. The Summit also provides psychological and psycho-educational testing, screenings and assessments for adults, children, and adolescents. The Summit developed cost-effective, early intervention screenings for mental health, learning disabilities and attention problems. When screenings indicate a need for more extensive testing, The Summit provides the full battery of psycho-educational or neuro-psychological testing. Nationally, the health, well-being and academic performance of children and adolescents is significantly hampered by undiagnosed mental health disorders, learning disabilities (and differences), and behavioral conditions. The Summit worked with area pediatricians to develop a screening protocol to provide more cost-effective mental health and neuropsychological screening tools to provide physicians and parents with effective means to identify these conditions. Early, cost-effective identification of mental health disorders allows physicians to ethically proceed with any needed pharmacological treatment without unnecessary additional testing. When screening tools detect the likelihood of a more significant underlying condition, additional testing can be administered while obtaining financial credit for the previous screening. Complete psycho-educational assessments allow parents, physicians, and educators to more effectively address student challenges and create a plan for academic success and greater overall well-being. In 2021-22, The Summit's neuropsychologist and psychometrist provided over 904 billable hours of screenings and assessments to 97 clients and their families.
