Research and Regulatory Affairs We promote human-specific, nonanimal approaches for use in research, testing, and education, through scientific support, policy change, and education and outreach. In FY 2023, our scientists continued our work to overcome barriers to uptake of nonanimal approaches. We provided input to relevant agencies through responses to requests for information, and notices in the Federal Register. To overcome bias toward animal use in research, our scientists established an international collaboration to provide evidence of the bias and implement strategies to overcome it. Our toxicologists actively promote the development and implementation of nonanimal-based tests for product testing, including through training established and early-career scientists. In FY 2023, we published a manuscript on reducing animal use in carcinogenicity studies. We presented to two federal agency advisory committees on the evaluation and integration of nonanimal approaches. We held 29 individual training sessions that included more than 6,000 scientists and professionals attending live, then offered the recordings for free in order to reach many more. To improve physician training, we work to replace animals in residency training programs. As a result of our work, only seven of 292 surveyed emergency medicine residencies in the US and Canada continue to use animals. In FY 2023, we launched new campaigns by filing federal complaints to challenge the use of live animals for medical training at three schools. We held four physician-led demonstrations and also posted advertisements targeting seven institutions. We ended animal use for medical or veterinary training at two schools: the University of California-Davis and Colorado State University.

4b (Code:) (Expenses \$ 3,438,246 including grants of \$) (Revenue \$ 31,315)

Communications Working with physicians, health experts, and celebrities who serve as spokespeople, we inform, persuade, and inspire readers through strategic media relations, social media, digital communications, print publications, and advertisements. Our work was featured in traditional news outlets, including The Washington Post, The Los Angeles Times, Associated Press, CNN, CNBC, Fox News, Reuters, New York Post, Popular Science, The Guardian, and many more. Our doctor-authored op-eds have been published in major newspapers including the Omaha World-Herald and The Tennessean. Over an average 30-day period in 2023, we placed 816 articles with a total engagement of 33,580 (number of times a link was shared, commented on, or liked on social media networks). Our social media content created conversations daily among more than 1.8 million followers on 16 social media accounts. In FY 2023, 29 million accounts were reached across Meta platforms. YouTube's following grew to 430k, up 97.5k followers from the previous year, making it the highest-growing account, and we reached 14.9 million people. The Exam Room podcast was downloaded more than 5.4 million times in FY 2023 and 15 million from its 2018 launch through FY 2023. Our website received 5,597,685 total page views in FY 2023. We completed more than 800 separately tracked print and display materials, promotional merchandise, and electronic graphics and e-publications. Good Medicine, the Physicians Committees 24-page magazine, keeps members informed and involved. Four issues of Good Medicine were published in FY 2023. Total print distribution was 339,794.

4c (Code:) (Expenses \$ 3,424,928 including grants of \$ 25,590) (Revenue \$ 392,104)

Form 990, Part III, Line 4d	OTHER PROGRAM SERVICES 4: OTHER PROGRAM SERVICES 5: CommunicationsWorking with physicians, health experts, and celebrities who serve as spokespeople, we inform, persuade, and inspire readers through strategic media relations, social media, digital communications, print publications, and advertisements. Our work was featured in traditional news outlets, including The Washington Post, The Los Angeles Times, Associated Press, CNN, CNBC, Fox News, Reuters, New York Post, Popular Science, The Guardian, and many more. Our doctor-authored op-eds have been published in major newspapers including the Omaha World-Herald and The Tennessean. Over an average 30-day period in 2023, we placed 816 articles with a total engagement of 33,580 (number of times a link was shared, commented on, or liked on social media networks). Our social media content created conversations daily among more than 1.8 million followers on 16 social media accounts. In FY 2023, 29 million accounts were reached across Meta platforms. YouTube's following grew to 430k, up 97.5k followers from the previous year, making it the highest-growing account, and we reached 14.9 million people. The Exam Room podcast was downloaded more than 5.4 million times in FY 2023 and 15 million from its 2018 launch through FY 2023. Our website received 5,597,685 total page views in FY 2023. We completed more than 800 separately tracked print and display materials, promotional merchandise, and electronic graphics and e-publications. Good Medicine, the Physicians Committees 24-page magazine, keeps members informed and involved. Four issues of Good Medicine were published in FY 2023. Total print distribution was 339,794. OTHER PROGRAM SERVICES 6: Clinical Research We design and conduct clinical health and nutrition research studies, with the goal of motivating more attention in diet and prevention among health care professionals, medical researchers, policymakers, and patients. Research staff and colleagues published 11 papers in peer-reviewed journals and presented their research at the American Diabetes Associations Scientific Sessions and at the International Symposium on Diabetes and Nutrition of the Diabetes and Nutrition Study Group of the European Association for the Study of Diabetes. We finished a 12-week clinical study for people with type 1 diabetes, tracking their insulin use and insulin sensitivity, and comparing a portion-controlled with a low-fat vegan diet. We are continuing a clinical trial, testing the effects of a vegan diet in women with endometriosis and its ability to reduce pain. We are currently conducting a study in partnership with Blue Cross Blue Shield, tracking not only clinical outcomes, such as body weight and glycemic control, but also health care expenditures in people with type 2 diabetes. Our goal is to build upon the body of knowledge of the value of plant-based diets and generate wider acceptance, among the medical and scientific communities, policymakers, and the press, of the power of plant-based diets to prevent and treat disease. OTHER PROGRAM SERVICES 7: Education and Policy We lead advocacy efforts to expand the adoption and availability of plant-based diets. We advocated in Congress toward ending the inequitable statutory barriers that prevent students from accessing nondairy milks at schools participating in the National School Lunch Program, increasing the availability of plant-based meals at schools, and pushing back against the dairy industrys efforts to force schools to serve dairy milk. We also work to revise the Dietary Guidelines for Americans to be focused on science, instead of unnecessarily promoting meat and dairy. At the state level, our advocacy resulted in the New York State Legislature unanimously passing legislation to provide physicians in the state educational resources about the benefits of better nutrition, including plant-based diets. We also work in communities around the country to ensure hospitals, schools, and other institutions have the knowledge and resources to maximize the benefits of plant-based foods. We also advocate at the federal and state level to encourage the funding, development, and implementation of human-relevant, nonanimal methods in medical research, education, and product testing. In Congress, our advocacy helped to secure funding in the FY 2023 omnibus spending bill for the FDAs support of cross-cutting initiatives to reduce animal testing through alternative methods, among other provisions supporting human-based testing at the agency. We also helped secure in the omnibus report language calling for expanded transparency and accountability for the NIHs use of animals. We worked with legislators in Rhode Island to introduce legislation that would prohibit the use of animals for medical training in cases where nonanimal methods exist, as well as with legislators in Michigan to introduce legislation that would prohibit painful experiments on dogs and cats. Physicians Committee President Neal Barnard, MD, FACC, oversaw clinical research studies and medical education programs, including the International Conference on Nutrition in Medicine. He presented at medical schools and hospitals and conducted interviews to educate listeners about healthful nutrition and modern ethical research methods. The Physicians Committees e-commerce and fulfillment operation provides educational literature and merchandise to its members, the health care community, and the public at large on topics relating to nutrition, disease prevention, and ethical science. In FY 2023, we had 596 new customers, 11,000 pieces of literature were downloaded from our website, and we fulfilled more than 1,000 physical orders of 44,834 pieces of literature and merchandise (books, DVDs, educational posters, etc.) to locations around the globe.
