Form and Line Reference	Explanation
Schedule H, Part V, Section B, Line 3 E	As a nonprofit, mission-driven organization, Fred Hutch is committed to partnering with our community to create longer, healthier and richer lives for our patients and everyone living in our service area. The work we do in the community is an extension of our core mission. The needs identified by data available to us, community stakeholder input, and feedback on our previous health needs assessments and implementation strategies have led us to prioritize cancer-related health needs that are clearly identified in the community and for which an evidence-based intervention exists that can improve cancer care and outcomes for our community. Fred Hutch assesses the health care needs of the community for the CHA via quantitative and qualitative data analysis. The CHA used population-based statistics to characterize the burden and differences of cancer in WA. When possible, we accessed data on indicators about individuals in all of WA's 39 counties directly from publicly available datasets, most of which are maintained by national, state and county government agencies. This data was then analyzed and interpreted to understand the community and its cancer burden overall, as well as the variations among certain populations within the community. Data was pulled from the United States Census Bureau, Behavioral Risk Factor Surveillance System (BRFSS), National Immunization System (NIS)-Teen database, Surveillance Epidemiology and End Results (SEER)/National Program of Cancer Registries (NPCR) datasets for cancer-related incidence and mortality data across racial and ethnic populations, as well as some of the behaviors that have been linked with certain types of cancer and the uptake of recommended cancer screenings. Data and statistical reports research and databases ranging from health care, education, demographic characteristics, and economic trends were pulled from the WA Department of Health, WA Office of Financial Management, and Washington Employment Security Department. Additional demographic information related to social determinants of health was reported including the Self Sufficiency index, County Health rankings of Income Inequality, and USDA data on food insecurity. We also reviewed and incorporated, where relevant, information from the joint Community Health Needs Assessment (CHNA) that Fred Hutch publishes together with the King County Hospitals for a Healthier Community (KCHHC) collaborative. Through this effort, 10 hospitals and health systems in King County identify significant health needs and assets in the communities we serve. Alongside public data and population-based cancer statistics a major component of the CHA is the interviews conducted with a variety of partners from across WA representing the broad interests of communities, including those with expertise in public health. The CHA highlighted community voices from 93 individuals from 55 organizations across WA, including participants of the Fred Hutch Patient and Family Advisory Council (PFAC). We designed semi-structured interview and listening session protocols to solicit community input to better understand their needs, strengths, and how we can be involved in addressing the issues or building on those resources. Interviewees were selected based on their work with specific organizations or identified by Fred Hutch's OCOE's Community Health Education team as individuals who could share their insights about the health of our communities. They represented Federally Qualified Health Centers (FQHC), colleges and schools, local public health agencies and community-based organizations working alongside a wide range of community members. These included AI/AN and Black individuals, people of color, seniors, individuals residing in rural areas, recent immigrants and refugees, LGBTQ+ people and other groups who face significant barriers to accessing cancer prevention and care. We also conducted listening sessions with each of the OCOE's community coalitions in western, central and eastern WA. These coalitions comprise groups of individuals working toward decreasing health disparities in cancer prevention and care, collaboration and resource sharing, and advising and informing the Fred Hutch. Additional listening sessions were done with the Fred Hutch PFAC to hear their firsthand perspectives around seeking treatment, barriers to care and opportunities for improved education and information offerings. Once completed, each interview or listening session was then transcribed, coded for themes and analyzed. After compilation and analysis, the CHA identified six key health needs across WA: 1. Access to care. 2. Culturally and linguistically responsive care. 3. Social determinants of health. 4. Preventive care. 5. Healthcare affordability and cost of living 6. Mental health. After we completed the CHA, we distributed a survey to prioritize the identified areas based on Fred Hutch's and our community partners' ability to address the needs. We shared the survey with the three coalitions that the OCOE facilitates in Western, Central and Eastern WA. We also shared it with the people who participated in the 2025 CHA listening sessions and one-on-one interviews as well as Fred Hutch PFA C members. In total, 56 people serving 11 counties - Benton, Ferry, Grant, King, Kitsap, Pend Oreille, Pierce, Snohomish, Spokane, Stevens and Yakima - completed the survey. After the survey, we held a prioritization session with Fred Hutch leaders and staff from different departments. Together, they reviewed the CHA findings, reviewed the goals from the previous plan, and decided which community health priorities to focus on for the 2025-2028 Implementation Plan. We chose our priorities based on several factors: how serious the need is, how many people it affects, whether certain groups are unfairly impacted, how much support or attention the issue is already getting, whether we can work with local organizations on it and whether Fred Hutch can make a meaningful contribution. This review concluded that the community health needs identified during the CHA were intertwined, thus, Fred Hutch combined the needs identified through the CHA into three priority areas: 1. Access to care. 2. Prevention and screening. 3. Social and economic drivers of health. A strong emphasis on culturally and linguistically appropriate services (CLAS), mental health integration, strategic partnerships and policy, as well as advocacy, cuts across these areas.
Schedule H, Part V, Section B, Line 5 Facility , 1	Facility , 1 - FRED HUTCHINSON CANCER CENTER. For the 2025 CHNA, Fred Hutch interviewed 93 constituents from across WA. They represented FQHCs, research centers, local public health agencies, tribal leaders and community-based organizations working alongside people from a wide range backgrounds, income levels, age and other groups with low access to cancer services. We designed a semi-structured interview protocol and included questions about the interviewee's organization and the services they provide, community needs and strengths, gaps or concerns facing communities they serve, resources needed, outreach strategies that has been successful, and what outreach strategies are needed. Interviews, surveys, and feedback was collected from August to November 2024. The following organizations kindly agreed to share their experience and expertise in interviews: Action Health Partners, Amend Health, Angel Flight West, Asian Counseling, Referral Service, Astria Health, Better Health Together, Cancer Pathways, Cancer Survivorship, Provider Network (CSPN), Center for MultiCultural, Health, CHAS Health, Chinese Information Service Center (CISC), Cierra Sisters, City of Toppenish, Community Safety, Network, Coordinated Care, C-Suite Center for Hope, El Centro de la Raza, Elevate Health, Feast World Kitchen, Garfield County Hospital District, GenPride, Innovia Foundation, Inspire Development Centers, Institute of Translational Health Sciences, Kadlec Regional Medical Center, Kadlec Tri-Cities Cancer Center, Kathleen Sutton Fund, Latino Educational Training Institute, Leukemia Lymphoma Society, Lincoln County Health Department,

Schedule H, Part V, Section B, Line 11 Facility , 1	Facility , 1 - FRED HUTCHINSON CANCER CENTER. We identified the following cancer-related community health needs through its CHA: access to care; culturally and linguistically responsive care; social determinants of health; preventive care; healthcare affordability and cost of living; mental health. We recognizes that many of the priorities identified in the CHA are intertwined and therefore combined the needs identified through the CHA into three priority areas in its implementation plan: 1. Access to Care 2. Prevention and Screening. 3. Social and economic drivers of health. A strong emphasis on CLAS, mental health integration, strategic partnerships and policy, as well as advocacy, are incorporated across these areas. The following objectives outline how we are addressing each priority area. Addressing socio-economic drivers of health: We are addressing socio-economic factors that prevent patients from accessing care and attaining their full health potential by assessing longitudinal screening of patients' needs and the need for rescreening and translation of the tool into 10 languages. We will also strengthen awareness of Survivorship and Patient Navigation programs. Additionally, we will provide financial assistance to patients and families who have non-medical financial needs for transportation, lodging, and food security and provide no-cost parking to patients who receive financial assistance or support through the Donated Family Assistance Fund. We will create new strategies for patient and family assistance to address financial toxicity in healthcare and work to reduce barriers to care and financial impacts on participation in clinical trials, including raising awareness about financial counselling and patient navigation and available services provided. We will also explore partnerships with Philanthropy to collectively address financial toxicity and explore viable models to provide financial support for eligible individuals. We will work together to ensure that more than half of all Fred Hutch sponsorships are to organizations working to address socio-economic factors impacting health in under-resourced communities. We will ensure food security among patients, their families, and caregivers and connect food-insecure individuals to resources by establishing a food pantry run by a Fred Hutch dietician and pilot a philanthropy-supported program to subsidize access to onsite food service for patients who qualify. We will ensure that every patient or community member who interacts with Fred Hutch receives CLAS support according to their cultural or linguistic needs improving . We will strengthen the capacity of community organizations who are rooted in and trusted by communities by providing grants in our catchment area and provide technical assistance to strengthen the capacity of community-based organizations. We will also work to educate and improve knowledge of cancer care and research among healthcare, allied health providers, and students while building programs that address workforce development in under-resources populations and geographic areas through providing opportunities for students, residents, interns, or fellows and provide curriculum and class support to the CareerWork$ program to support low-income young adults in advancing their careers in healthcare. Providing comprehensive cancer prevention, education, and screening: We will provide education about healthy behaviors, recommended screening, treatment options, clinical trials, and available resources. We will participate in community health events, establish community partners, expand partnerships with three FQHCs, and maintain and expand enhanced internal integration for community impact through a cross-department community engagement working group. We will also develop county-specific fact sheets to educate community partners and the public and inform policy, grant applications, and decision making about resource allocation. We will prioritize work in areas of lung, breast, and prostate cancer. We will collaborate with community-based organizations, tribal nations, and government agencies to reduce the rate of commercial tobacco use and increase access to lung cancer screening. To do this we will expand access to lung cancer screening and commercial tobacco cessation resources for tribes in Western WA and for priority populations with high rates of smoking and lung cancer. We will expand the number of community advisory meetings held with tribal community partners and number of community outreach events completed. We will support partnering sites with lung cancer screening and expand access to lung cancer screening outside of our facilities by approving a business plan for a mobile CT unit to reach communities where they are. We will also increase awareness of lung cancer screening and screening for tobacco use among medical and primary care providers serving Indigenous and other communities with a high rate of commercial tobacco use using provider training sessions. We will increase the number of people from priority populations who are receiving recommended breast cancer screening. To do this we will deliver mammography screenings via Mammogram Vans and explore opportunities to grow the number of Mammogram Vans. We will also partner with community organizations to support outreach events, education. We will also sustain and evolve partnership with UW Medicine to increase breast cancer screening for Black people. We will increase awareness about prostate cancer disparities, risk, ands screenings among Black and African American people. To do this we will maintain a knowledge-to-action campaign centered around the living experiences of Black and African descent people and increasing awareness about prostate cancer screening, diagnosis and outcomes. We will also host an annual Black and African-descent Collaboration for Prostate Cancer Action (BACPAC) Prostate Cancer Community Research Symposium to discuss breakthroughs in prevention, detection, and treatment. Delivering access to affordable care: We will expand prevention, screening, research, education, and supportive services across the state. We will do this by offering prevention and screening services to help reduce access challenges in at least 14 sites in south King County, Pierce County, and other communities that face higher cancer burden. We will also support expansion of support group access in Central and Eastern WA by establishing Spanish-language support groups in Central WA and Eastern WA. We will sustainability improve access to clinical trials for all patients across WA by implementing recommendations by the Patient Needs and Outcomes Council, increase participation in clinical trials among under-resourced populations, and support pilot projects with community clinics to expand access to clinical trials. We will prioritize public health education and advance policies seeking to reduce challenges to care by facilitating annual meetings with policymakers to provide education about opportunities to increase access to prevention, screenings and high-quality care. We will also select one community benefit priority as a Commission on Cancer (CoC) Barrier to Care accreditation and identify barriers to focus

	on. A report will be shared with the CoC committee each year that includes priority areas selected, challenges identified, resources used, and metrics related to outcomes. We will enhance access to mental health care for patients, families, and the community by strengthening relationships with community-based mental health providers to increase mental health support, increase mental health access for cancer survivors, and maintain an institution-wide suicidal ideation assessment and dissemination of resources. We will facilitate research relevant to the catchment area to reduce the burden of cancer, including engaging catchment area communities with researchers by expanding the TakePart-NW research program to all Fred Hutch clinic locations, UW Medicine sites, and other facilities around Washington. While these priority areas encompass many of the identified needs, we do not have the capacity or scope to address every issue. For example, challenges such as the unavailability and high cost of childcare fall outside of our direct role and resources. While we are not directly addressing environmental health and climate change within this Community Benefit Implementation Plan, we know that physical health goes hand in hand with a healthy environment. Energy conservation, recycling and composting, water conservation and sustainable transportation are embedded in everything we do. We aim to support environmental policies , systems and research that promote sustainable and climate-resilient operations at our facilities.

Schedule H, Part II Community Building Activities	Fred Hutch Cancer Center (Fred Hutch) through its various programs, research, and specifically the Office of Community Outreach and Engagement (OCOE), works to improve health outcomes and address cancer health issues through authentic relationships, advocacy, and collaboration. This includes community-based research, resource support, and cancer prevention education informed by community-determined needs. The OCOE team works to build community partnerships across Washington State (WA). We work with individuals and organizations across the state on projects to improve health outcomes by raising awareness about cancer prevention and screening. We facilitate mutually transformative and beneficial collaborations by providing resources and connections for community partners to engage in research that is meaningful and relevant to their communities, and supporting researchers interested in community-engaged research. We build relationships and collaborations with partners across WA to facilitate programs that build on community strengths, strategies, and goals. OCOE hosts three community coalitions across WA. By highlighting and sharing regional community feedback and priorities, coalitions support sustainable cancer care programs and build capacity for research collaboration. Together, we work toward listening to community voices, experiences, and expertise to reduce cancer disparities for residents in WA. The Indigenous Cancer Health Excellence Initiative (ICHE-i) within the OCOE addresses the high burden of cancer incidence and mortality in American Indian and Alaska Native (AI/AN) populations in the state of Washington. ICHE-i supports Indigenous-led solutions to promote health, address cancer health disparities among American Indian and Alaska Native (AI/AN) communities and culturally aligned cancer care and research across Washington State (WA). Grounded in Indigenous knowledge systems and values, ICHE-i fosters sustainable partnerships with tribes and Urban Indian Organizations (UIOs) to advance cancer health excellence.

Schedule H, Part III, Line 8 Community benefit & methodology for determining medicare costs	FRED Hutch COMPLETED PART III, LINE 6 USING THE ALLOWABLE COSTS FROM THE AS-FILED MEDICARE COST REPORT FOR FY25. THE METHODOLOGY USED TO COMPLETE THE MEDICARE COST REPORT WAS BASED ON THE CMS PROVIDER REIMBURSEMENT MANUAL, PUBLICATION 15. IN ADDITION TO MEDICARE AMOUNTS REPORTED ON THE MEDICARE COST REPORT, FRED HUTCH HAS A NON-MEDICARE COST REPORT FEE SCHEDULE AND MEDICARE MANAGED CARE COST FEE SCHEDULE. THE NON-MEDICARE COST REPORT FEE SCHEDULE AND THE MANAGED CARE REVENUES ARE BASED ON THE REIMBURSEMENT RECEIVED FROM MEDICARE. THE COSTS ARE DERIVED USING THE RATIO OF COST-TO-CHARGES FROM THE AS-FILED MEDICARE COST REPORT. THE TABLE BELOW REFLECTS TOTAL REVENUES AND EXPENSES ATTRIBUTABLE TO ALL OF FRED HUTCH'S MEDICARE PROGRAMS: Part III, Section B Non-Cost Report Fee Sched. In addition to the $120,927,306 shortfall reported on Part III, Line 7, Fred Hutch incurs additional costs in treating Medicare patients, which results in an additional shortfall in the amount of $60,675,415, which is not reflected in the amount listed on Part III, Line 7.

Form and Line Reference	Explanation
Schedule H, Part VI, Line 2 Needs assessment	Through the CHA process, Fred Hutch assesses the occurrence of cancer in the communities we serve and ensure participation reflects all of our communities. In addition to our CHA assessment process, Fred Hutch, a member of the Fred Hutch/University of Washington/Seattle Children's Cancer Consortium (Cancer Consortium), works with Seattle Children's Hospital and the University of Washington to focus on developing and delivering the best cancer prevention and treatments available. We then make strategic investments in research to address areas of cancer-related health needs in our communities. Furthermore, Fred Hutch is a member institution of the King County Hospitals for a Health Community collaborative, which joins together 10 hospitals and the Public Health Seattle & King County to conduct a comprehensive community health needs assessment for the county and identify opportunities for the development of collective, data-driven strategies to address community health needs.
Schedule H, Part VI, Line 3 Patient education of eligibility for assistance	Fred Hutch provides information on our website which includes the financial assistance policy, plain language summary and application in English and 9 other languages, as well as a list of outside resources available to patients in need of assistance. Signage is posted publicly in our outpatient clinics and hospital, informing patients and persons of the availability of financial assistance. Brochures describe the financial assistance program along with contact information for Fred Hutch financial counselors who are available free of charge to help review their information and to help complete the necessary paperwork to apply for assistance. Interpreter services are available if needed. Patient billing statements include a written notice of the availability of financial assistance and a direct link to the website.
Schedule H, Part VI, Line 4 Community information	Fred Hutch serves a diverse patient base, many of whom travel long distances to receive care. Patients come from every county in WA. The "catchment area", or service area, refers to the self-defined geographic area that each NCI Designated Cancer Center serves or intends to serve in the research it conducts, the communities it engages and the outreach it performs. Fred Hutch and the Cancer Consortium expanded their defined catchment area in 2022 from 13 counties in Western WA to include all 39 counties of the state. Nearly 8 million people live in WA. Approximately 30% are under the age of 25, while 17% are age 65 or older. Females slightly outnumber males. Overall, 14% of people in Washington identify as Hispanic, compared to nearly 20% of the U.S. population. However, the populations of several counties in central and eastern WA are more than 50% Hispanic, including Adams, Franklin and Yakima counties. The highest percentages of Hispanic residents were found in central WA, including Adams (65.5%), Franklin (55.4%) and Yakima (55.4%) counties. Although representing a lower proportion of the total counties' population, large numbers of persons of Hispanic origin lived in western WA's largest metropolitan counties, notably King (266,462), Pierce (125,001) and Snohomish (107,120) counties. There are 47 federally-designated medically underserved areas in WA. Approximately 65.2% of the population of WA is non-Hispanic White, compared to 60.5% of the U.S. Compared to the U.S. as a whole, a larger proportion of the population of WA is Asian (10.0% v. 6.0%), NHOPI (0.7% v. 0.2%), whereas a smaller proportion is Black (4.0% v. 12.1%). More than 95,000 people in WA are AI/AN (1.2%). The AI/AN population includes members of 29 sovereign Tribal Nations in WA, members of other federally recognized tribes in the U.S., and urban Indian communities. Of people aged 5 years and older, nearly 8% report speaking English less than very well. Seventy-eight percent of the WA population primarily speaks English at home. Spanish (9%) is the second most common language spoken at home in WA, followed by Chinese languages (2%) and Vietnamese (1%). In total, over 1.5 million people (21%) over the age of 5 years in WA speak a language other than English at home. Nearly 10% of households in WA have an annual income of less than $20,000, compared to 13% of U.S. households. Conversely, 28% of WA households have an income greater than $150,000, compared to 22% of U.S. households. The percentage of people living in poverty is lower in WA than in the U.S. across every age group. For a family or household of four persons living in one of the 48 contiguous states or the District of Columbia, the poverty guideline for 2024 is $31,200. However, considerable variation in the distribution of poverty exists by race and ethnicity. Specifically, AI/AN, Black and NHOPI people in both WA and the U.S. are approximately twice as likely to live in poverty as Asian or White people. While the poverty level is established at $31,200 for a family of four anywhere in the contiguous U.S. in 2024, the annual Self-Sufficiency Standard for a WA household with two adults and two children ranges from $72,014.78 (in Franklin County) to $123,297.59. In WA, households with higher incomes had income 4.4 times greater than that of households with lower incomes (Figure 9). This inequality ranged from 3.5 times (Garfield County) to 7.3 times (Whitman County) across the state. WA's seasonally adjusted unemployment rate for November 2024 (the latest confirmed rate at the time of this publication) was 4.6%, compared to the 4.2% unemployment rate in the U.S.13 Figure 10 shows the unemployment rate by county. Ferry (8.3%) and Grays Harbor (6.9%) counties had the highest unemployment rates, whereas Asotin (3.2%) and King (3.8%) counties had the lowest rates. In WA, nearly a third (28.9%) of homeowners and nearly half (48.9%) of renters are considered cost-burdened. These figures are similar for renter and owner households in the U.S. (27.3% and 49.9%, respectively). Pacific, San Juan, Jefferson and Ferry counties have the highest percentage of both renter and owner cost-burdened households in the state. Some 205,391 households in WA (6.9% of the total occupied housing units) do not have a vehicle available. An estimated 891,960 people in WA are food insecure, representing approximately 11.2% of the state's population. The overall uninsured rate in WA has decreased since the implementation of the Affordable Care Act (ACA) in 2010, from 14.2% to 6.3% in 2023. The uninsured rate in the U.S. in 2024 was 8.7%. Approximately 1.8 million people are enrolled in WA's Medicaid program (Apple Health). There are approximately 90 other hospitals servicing WA however they vary by type (e.g. short-stay vs. all types) however Fred Hutch is the only Comprehensive Cancer Center in Washington.
Schedule H, Part VI, Line 5 Promotion of community health	Fred Hutch contributes to community health promotion through a variety of programs and activities, examples of which are outlined below. Training health professionals, teachers, and students: Our contribution is broad because we have unparalleled resources to share what we know through the education of doctors, nurses, and scientists, publications in leading medical journals, and specialized training and symposia for medical professionals. We are proud to be a hub for continuing medical education (CME) in our region. Fred Hutch participates in multiple education and training programs for physicians, nurses and other allied health professionals. This includes residency, rotations, shadowing and other programs to allow health professional trainees to develop expertise in specialized oncology skillsets, thereby improving the local healthcare workforce's overall capacity to address the community's health needs related to cancer. Fred Hutch also has a longstanding commitment to training the next generation of scientists. We offer scientific education and training programs for 1) elementary school students to start an early interest in science, 2) hands-on experiences with our researchers for high school students, 3) internships for undergraduate and recent college graduates, 4) a Science Education Partnership to pair secondary school science teachers with research scientists to teach science in the classroom, 5) Post-baccalaureate Scholar Program for individuals who would benefit from research experience and training to be competitive for biomedical PhD programs, 6) training opportunities for graduate students, and 7) postdoctoral fellowships in our research divisions. Community Coalitions and Support Grants. Fred Hutch's OCOE supports 3 regional groups, the Community Action Network of Eastern WA (CANEW), Central WA Community Action Board (CAB), and Western WA Community Action Coalition (CAC). Fred Hutch collaborates

Form and Line Reference	Explanation
	with members of these coalitions to support sustainable cancer care programs and build capacity for research collaboration. Coalition members provide insight from their lived experience and organizational roles to facilitate understanding of community specific cancer prevention and control needs. Together, we work toward listening to community voices, experiences, and expertise to reduce cancer inequities for residents in WA. OCOE also supports a Community Grants Program. The goal of the Community Grants Program is to support community-led solutions that address cancer related prevention, screening, education and access to care with communities and Tribes in WA. This program strengthens collaborations between the Consortium and WA communities and Tribes by building the capacity to design and implement sustainable programs. Clinical research: Fred Hutch has hundreds of clinical trials open at any given time. This provides our community with access to groundbreaking treatment options. As the only National Cancer Institute-designated comprehensive cancer center in a five-state area (WA, WY, AK, MT, ID), the access to clinical trial participation is a valuable resource to patients across the region. Fred Hutch also has dedicated staff to report patient-level data to state and national cancer registries for solid tumor and bone marrow transplant populations to help advance the clinical evidence base. Community health services: Fred Hutch has relationships with FQHCs located within the medically underserved areas in King, Snohomish and Pierce counties. Fred Hutch has specific contracts with Public Health - Seattle & King County and Sea Mar Community Health Centers to provide preventive health screenings to the local underserved communities. Fred Hutch is also part of the Breast, Cervical, and Colon Health Program (BCCHP). The purpose of the BCCHP is to reduce morbidity and mortality from breast, cervical and colon cancers by the early detection of cancer through free screenings. Fred Hutch provides breast cancer screening through regular mammograms. Fred Hutch accepts referrals of patients who have a finding on their mammogram and performs diagnostics and treats patients who are deemed to have cancer. Since 2014, Fred Hutch has participated in the annual Seattle-King County free clinic to provide necessary health care to individuals with traditionally limited access, including cancer screenings and other medical services. Fred Hutch provides breast cancer screenings through its Mammogram Van and Fred Hutch staff volunteer at the event. Community health education: Fred Hutch provides community education programming for cancer survivors, including medical nutrition education to community cancer support groups, wellness conferences and cancer survivorship conferences. Fred Hutch also provides monthly survivorship education. Furthermore, Fred Hutch attends local community health fairs and events to provide cancer screening information and tobacco cessation education and counseling to the community at large. Health policy advocacy: Fred Hutch invests resources in advocating for policies that improve the health of our community, lower the burden of cancer-related disease, and increase access to high-quality, innovative, and affordable cancer care. For example, Fred Hutch researchers and clinicians supported the rapid adaption of clinical trial research to the circumstances of enrolling and treating patients on protocols during the COVID-19 pandemic. COVID-19 vaccine distribution: Fred Hutch was among the first Washington healthcare providers to receive the COVID-19 vaccine and distribute doses to patients, families and the broader community. We partnered with community-based organizations, public schools, faith-based organizations, low income/high density housing groups, and production and manufacturing facilities to host mobile clinics and reach access-limited communities. Institutional service to the community: Fred Hutch has a long and proud reputation of collaboration with other healthcare, governmental, and nonprofit organizations in the development and deployment of community education programs, wellness initiatives, and awareness campaigns. We are also community servants in that Fred Hutch is governed by a seventeen (17)-member Board of Directors, including thirteen (13) community directors and four (4) ex-officio positions. The community directors bring a diverse range of expertise and perspectives from across health care, technology and professional services sectors.
Schedule H, Part VI, Line 6 Affiliated health care system	Fred Hutch serves as the cancer program for UW Medicine, an integrated clinical, research and learning health system. Fred Hutch and UW Medicine share complementary goals and expertise in delivering care, with Fred Hutch focusing on caring for cancer and related blood disorders, while UW Medicine offers an extensive range of specialty care for other health needs. Cancer care providers are dually credentialed to treat patients at Fred Hutch and UW Medicine locations, giving patients greater access to cancer treatments and supportive care.
